

Industry Roundtable – Annual Report 2015

Natan Bornstein, Chair

The Industry Roundtable has met on two occasions in 2015:

1. ISC (February in Nashville) and
2. during the ESOC 2015 (April in Glasgow).

A central discussion point was the need, and subsequently setting-up, of the European Stroke Organisation Conference (to be held the second time in May 2016 in Barcelona).

Attending companies were very supportive of this development and offered useful comments on how this might best be delivered.

Various ESO industry and economics activities and their importance were pointed out. Continuous support of these events, e.g. ESO Stroke Summer School / Winter School as well as ESO-EAST workshops is highly appreciated and is in line with ESO's mission to promote education and to harmonize stroke care and management across Europe.

Attending companies involved:

- At ISC 2015: AstraZeneca, Boehringer Ingelheim, BrainsGate, Covidien, EVER Pharma, Penumbra, Stryker
- At ESOC 2015: AstraZeneca, Boehringer Ingelheim, BrainsGate, Daiichi Sankyo, EVER Pharma, Medtronic, Penumbra, Stryker,

A workshop on outcome measures resulted in 3 publications and several pre-conference workshops took place (ESO-EAST, ESO-VISTA Health Economics and ESO Clinical Trial Network Committee workshop).

New Industry Roundtable Member 2015: Stryker

Industry Roundtable Corporate Members:
