### **2. Activities 2016/2017**

- Analysis of data on the development of telestroke networks in Europe: finalized
- Manuscript on European survey: ongoing
- Organization of workshop on how to telemedically support endovascular therapy
- Composition of ethical questions regarding telemedical trial recruitment and forwarding to European ethical committees
- Publication of purpose and aims of the TeleStroke Committee in response letter in Stroke
- Change of chair and development of new action plan for coming three years with the aims to a) increase intravenous thrombolysis in remote European areas, b) to aid selection of stroke patients for intended endovascular stroke thrombectomy and c) to optimize recruitment of stroke patients into research trials with help of telemedicine
- Support of Eastern European workshops and Stroke Units in the development of telestroke networks
