

## ESO Dementia Committee Report 2017

The report of the Dementia Committee is still small, as the Dementia Committee is quite recent.

Activities so far were:

1. To constitute the group, inviting possible members from different countries, interested and active in vascular and cognitive topics. The final group is as follows: Ana Verdelho, Portugal (Chair), Members: Aleksandra Pavlovic, Serbia, Andreas Charidimou (UK, Greece/Cyprus, US), Franz Fazekas, Austria, Hugues Chabriat, France, Joanna Wardlaw, UK, Marco Düring, Germany, Olivier Godefroy, France, Leonardo Pantoni, Italy, Geert Jan Biessels, Netherlands

2. To select topics of interest to develop. 5 initial proposals were sent, but in a practical approach, 2 proposals are in discussion now, that we hope to discuss in the first meeting of the group in Gothenburg (focusing the VCI construct).
