### **Industry:**

Matthieu Cuche, Switzerland  
Natalia Muehleemann, Switzerland

# Report of the Health Economics Working Group (Chair: Dominique Cadilhac)

---

- Members of the working group met in Milan (May 2019) to discuss the next steps to finalise and submit a manuscript detailing guidance documents for economic evaluations of stroke care, and future work for the working group.
- In December 2019, our manuscript was accepted to be published in the European Stroke Journal.
- In 2020, we will develop a data sharing procedure and mapping process and consider options for collaborative work using the VISTA platform
- The group is also exploring how best to use social media to support communication about the group and the work being undertaken
