 - Oral presentation: No associations between environmental exposures and stroke severity in a low pollution area: a register-based study in Sweden by Tamar
 - Poster 2671-ESOC2025-LB-251 – Evaluating the impact of integrity combined with standard medical care in post-stroke rehabilitation – by Pushpendra
 - Poster presentation: Evaluating cognitive impairments following isolated cerebellar stroke by Tamar

- Presence in 17th WSC 2025 (Barcelona)

- Presence in ISPRM 2025

- Presenting a workshop on Stroke Rehabilitation by Raquel

- Collaborations initiated:

- SAP – E: “Access to Rehabilitation Services in Europe Survey”
 - ESPRM: SIG Stroke
 - ESLA

Activities 2025

ESOC 2026 Proposals submission – not selected:

- “Spasticity and Stroke Recovery: Timing, Tools, and Targets”
- “Early Stroke Rehabilitation in Acute and Hyperacute Settings: A Multidisciplinary Framework”
- “Remote Neurorehabilitation: Building Effective and Equitable Models”

2025 Challenges

- Members engagement
 - Despite efforts to optimize the committee's dynamics and workflow, external factors such as the summer holiday period and the end-of-year workload for members made achieving the expected participation and progress difficult.
- Adjust the committee dynamic to the existing pace of other projects that are ongoing and could be a good collaboration
