- Tobias Nef, Switzerland

Report of the ESO Neurorehabilitation Committee

Update on recognition for earlier work

[Pohl J, Held JPO, Verheyden G, Alt Murphy M, Engelter S, Flöel A, Keller T, Kwakkel G, Nef T, Ward N, Luft AR, Veerbeek JM. Consensus-Based Core Set of Outcome Measures for Clinical Motor Rehabilitation After Stroke-A Delphi Study. Front Neurol. 2020 Sep](#)

- Selected in [top 10](#) for Frontiers in Neurology - Neurorehabilitation Editor's Pick 2021
- Awarded with [Reha Rheinfelden](#) prize 2021, presented and received by Johannes Pohl (lead author)

Reha Rheinfelden REsearch @RehaREsearch · 17 Dec 2021

The Winner of the Research Award of the Reha Rheinfelden received his award on the 09.12.2021. Thank you for the very interesting talk and the fruitful discussion on the Core Set of Outcome Measures for Clinical Motor Rehabilitation After Stroke frontiersin.org/articles/10.33...

Report of the ESO Neurorehabilitation Committee

Continuation of earlier initiatives (lead: A. Luft):

- Organising pre-congress course on stroke rehabilitation
- Consensus-based core set on neuropsychological outcome measures

Initiation of new initiatives (lead: G. Verheyden):

- ESO Guidelines on motor/gait rehabilitation
 - Start early 2022
