

ESO Department to Department Visit Programme 2022 Host Institution: University Hospital of Bern

FINAL REPORT

I would like to express my deep gratitude for the ESO's generous contribution and support for my clinical practice in University Clinic of Bern - Inselspital. This experience was extremely informative and important for me, which motivated me for my future clinical work. I am very happy that I had a chance to work with Prof. Arnold Marcel and his hardworking team. During my stay I acquired new practical skills. In the Emergency department, I was very impressed how fast the doctors were working and investigating the patients, or the decision making for thrombolysis and thrombectomy. I was in Stroke Unit, where I participated in morning rounds with doctors, where they discussed each patient, and each case with investigations and treatments in great details. I have been involved in outpatient clinic with neurosonography, which was a great experience for me, because in Armenia neurologists don't perform this examination, and i learned how to do it. I hope that after i return to my country i will be involved in stroke team and do neurosonography. All I learned, I'll try to invest the same in our clinic and share my new knowledge with my colleagues. I also got the Stroke pocket guideline in English, which i will use with pleasure in my daily work. I am so grateful to all organisers of ESO for their huge support and the opportunity which they give to young neurologists from different countries, allowing them to be involved in advanced medical clinics and develop their experience.

Sincerely Yours

Kind Regards

Meri Grigoryan, MD Neurologist

Astghik Medical Center

Armenia, Yerevan
